Available in standard and custom colors. *For use inside a lighting cabinet. ****For second surface applications only.

Translucent Films for internally illuminated sign applications

Note that the elements used in sign construction, including sources of illumination, adhesives and substrates, can affect color. In most instances, color variation is slight, but certain elements will have a more noticeable effect, particularly on shades of white. PANTONE® color numbers are based on reflective light measurements of product samples applied to a standard white substrate.
